PROJECTS

Travel And Tourism Management System Project
Using Core Java(Swing and AWT) , MYSQL
The main objective of the Tourism Management System is to manage the details of Customer, Hotel Booking, Cancellation and Tourism places. It manages all the information about Users, Hotel, Packages etc. The project is totally built at administrative end and thus only the administrator is guaranteed the access to the backend database. The purpose of this project is to build an application program to reduce the manual work for managing Tourists, Booking, Places etc.

React E-commerce Website 🔗
Tech: HTML, CSS, JavaScript, Bootstrap, React JS
A React E-commerce Website is built using React.js, incorporating skills in JavaScript, API integration, responsive design, and security
to create an efficient, user-friendly online shopping experience.
